Do you ever have a room that is just blistering hot?
PAUSE
 Or beyond freezing cold?
PAUSE
Do you find that your electricity and gas bills keep rising? Is it beyond frustrating to watch your money be sucked up by your HVAC system just due to a change in weather?
If you have experienced any or all of these situations boy, do we have the solution for you!
Here at Sustainable vents, we offer the Ecovent 1.20. Using the most innovative technology, our device not only opens and closes your vent depending on the room temperature, but it also displays it on a small local screen.
Now what makes our device special? It is affordable, intuitive, and incredibly versatile! You can attach our Ecovent to any HVAC floor vent that you have. Additionally, our web servers connect to all of your local devices, allowing you the ability to view the temperature, humidity, and efficiency of each location. Using this data, one can easily be notified of which rooms lose a controlled temperature the fastest, thus saving YOU money.
Our competitors might say that they are the best, but with an expensive install and a lack of controlled temperature room loss, they fall behind the Ecovent 1.20.
For only $19.99, you can get one of our Ecovent 1.20s and start being smart with your money!
But wait, there's more! If you call within the next 15 minutes, you can get 2 additional Ecovent 1.20s with each unit purchased! Not only will you get 2 additional Ecovent 1.20s, but we'll even throw in some of our exclusive company stickers!!!!!?!
So CALL NOW AND START SAVING THE WORLD AND YOUR ELECTRICITY AND GAS BILL ONE VENT AT A TIME!!@!@!!!!??/!
Here's how to order.
